

**REPORT OF  
HARDWARE DIAGNOSTIC TEST FOR  
CITY OF ASPEN REGULAR MUNICIPAL ELECTION  
TO BE HELD ON MAY 3, 2011**

1. My name is Dwight K. Shellman III. At all pertinent times hereto, I have been engaged as an election consultant by the City of Aspen for purposes of the 2011 municipal election cycle. I was also deputized by the City of Aspen Clerk, Kathryn Koch.
2. On April 21, 2011, at approximately 5:00 am, I logged into the tabulation computer and opened GEMS, the ballot design and tabulation software, and program seven (7) memory cards for the May 3<sup>rd</sup> election.
3. On April 21, 2011, from approximately 4:30 p.m. to 11:45 p.m., I conducted the Hardware Diagnostic Test mandated by City of Aspen Election Rule 8.02 on seven electronic voting devices to be deployed for the May 3<sup>rd</sup> election. The machines I tested were programmed and configured as set forth in Table 1:

<b>TABLE 1 – EQUIPMENT INVENTORY FOR 5/3/2011 GENERAL MUNICIPAL ELECTION</b>					
<b>MODEL</b>	<b>FIRMWARE</b>	<b>SERIAL NO.</b>	<b>MEM CARD</b>	<b>POLL/CENTER</b>	<b>RPTG. PCTS.</b>
AVOS 2000	1.94w	44343	107600	Rio Grande #1	1-3
AVOS 2000	1.94w	86337	61659	Rio Grande #2	1-3
AVOS 2000	1.94w	44531	58619	Schultz HHS #1	4-5
AVOS 2000	1.94w	86339	88978	Schultz HHS #2	4-5
AVOS 2000	1.94w	86340	71834	Absentee #1	1-5
AVOS 2000	1.94w	86343	80802	Absentee #2	1-5
AVOS 2000	1.94w	86475	117107	Absentee #3	1-5

4. The Hardware Diagnostic Test is designed to ensure that the voting equipment is operable, and that all input and output devices are functioning. I developed a checklist for each machine, which I completed as I put each machine through the Hardware Diagnostic Test. The completed checklists are attached hereto as Exhibit 1.
5. Although not required in the Hardware Diagnostic Test, I also ran the pre-printed test decks – Quality Control, Multivote and LAT decks – through each machine. I also uploaded the results from at least one of the test decks on each machine. I printed tabulation tapes, which are stapled to each machine’s Hardware Diagnostic Checklist. In addition, I printed either

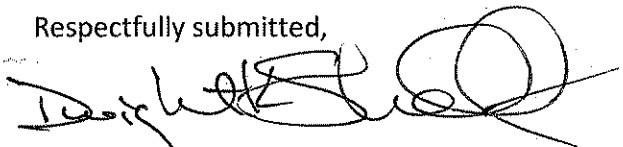

Election Summary Reports or Statements of Votes Cast from GEMS for at least one data upload from each machine. The GEMS tabulation reports are attached hereto as Exhibit 2.

6. As a result of this testing, I am satisfied that each machine to be deployed in the May 3, 2011 regular municipal election is functioning and tabulating correctly. I am also satisfied the memory cards are properly programmed, and that the machines communicate and accurately upload results and other data to the tabulation computer.

7. At the conclusion of testing each machine, I removed the memory cards and affixed five (5) adhesive seals to each machine – one seal on each side of the machine, and one seal over the empty memory card slot. I also started chain of custody logs for each machine, and noted the seal numbers on each separate log. I then returned each machine to its case, and all cases to the locked storage room in City Hall. These protocols are now required for City of Aspen electronic voting equipment, pursuant to Election Rules 9.03 - 9.05.

8. I returned the seven programmed memory cards to the secure storage location in my office at the Pitkin County Clerk and Recorder's office for the remainder of the evening. I ultimately installed them in their assigned AVOS machines on Friday, April 22, 2011, at the beginning of the formal Logic and Accuracy Test. This was done in the presence and under the observation of election judges Pam Cunningham and Mike Simmons. The memory cards were sealed in their respective machines at the end of the LAT. The seals are noted in the pertinent chain of custody log, which was signed by Pam Cunningham and Mike Simmons. All AVOS machines were then put in their nylon cases, and the cases were returned to the locked storage room in City Hall.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Dwight K. Shellman III", written over a horizontal line.

Dwight K. Shellman III  
Election Consultant and Deputy City Clerk

## EXHIBIT 1 – HARDWARE DIAGNOSTIC CHECKLISTS

HARDWARE DIAGNOSTIC SHEET CHECKLIST

AVOS S/N 44343

DATE 4/21/2011

RioGrande #1

TIME 8:30pm

- Unit powers on - power button operable
- Firmware version 1.94w displayed
- System Test Passed
- Public counter display is operable and displays 0 ballots
- Front panel menu buttons operable
- Unit accurately reads City Test Deck (tape attached), Multivote Test Deck & QC Test Deck
- Comm port functions – results accurately uploaded to GEMS
- Printer functions – tape and printer ink changed
- Unit case sealed at seams – seals noted in chain of custody log
- Case contains:
  - Extra ink and paper
  - Keys
  - Ender card
  - Poll worker instructions
  - AC cord

- Other: overrode full & blank voted ballots.
- Other: tabulation tape attached.
